Welcome to the June 2004 edition. I extend a special welcome any new subscribers to the Newsletter. As usual, your contributions, as well as your comments, are always appreciated.

Well, we surveyed people on who they think the next U.S. President will be. Now we have a federal election coming up at the end of June. No doubt the media will be clogged with election campaign material for the next few weeks.

## UPDATE ON BAILLIE BIRDATHON

I completed the 2004 Baillie Birdathon on May 12th, with a total of 76 species of birds seen over a 14-hour period. Best of all, I was able to raise over $1000 in pledges for Bird Studies Canada. I'd sincerely like to thank the eight Radio HF Internet Newsletter subscribers who stepped forward to support my cause. They are Dick Pearce of Guilford, Vermont; Brian Jeffrey of Carp, Ontario; Edward Janusz of Stonington, Connecticut; James Strader of Middleborough, Massachusetts; Ricky Leong of Brossard, Quebec; Howard Gontovnick of Laval, Quebec; and Janice and Steve Karlock of Dorval, Quebec. I truly appreciate your generosity and support.

## THE MONTHLY SURVEY

Last month's question was a simple one: "Who will win the November 2004 U.S. Presidential election? George Bush, John Kerry, or someone else!"

Only 28 of you participated in the survey this month. The results are in:

John Kerry -- 18 votes or 64.3%
George Bush -- 10 votes or 35.7%

From my point of view, I hope this is somehow accurate.

## THIS MONTH'S SURVEY

Let's focus on the media and news coverage this month for our survey. We have many sources of news available to us; radio, television, newspaper, magazines, the Internet, etc. Certainly the Internet has made many of the standard news sources readily available to us. We have also been introduced to many new sources such as on-line news journals, e-zines, etc.

Our question this month is this: Which source of news do you personally find to be the most accurate and reliable?

It might be CNN, the BBC World Service, the Canadian Broadcasting Corporation, the New York Times, USA Today, the Drudge Report, etc.

Please be very specific with the name and type of medium it is, (example: print, radio, TV, etc.)

Please send your response, by e-mail, to
hfnewsletter@yahoo.com

## NEW FROM OPTOELECTRONICS
## THE X-SWEEPER

The new X Sweeper is a near-field receiver with a graphical display that displays the near-field RF (analog only) in a spectrum format, allowing the user to rapidly observe all signals that are present, not just one single frequency at a time. Once a signal is received, the X Sweeper demodulates the FM audio through its built in speaker. With a frequency range of 30MHz - 3GHz, the X Sweeper can sweep and lock onto a broad range of frequencies in a matter of seconds. The 25 button keypad allows easy access to all functions, provides a direct numerical entry for the center frequency of the sweep range to be easily selected, and easily tunes to a specific frequency in VFO mode.

For more details on this unique model from Optoelectronics, please visit:

http://www.optoelectronics.com/xsweeper.htm

This model, as well as other fine Optoelectronics products, is available from Radio HF. Please contact Radio HF for pricing and shipping details.

Strike The Root is a daily journal of current events and commentary from a libertarian/market anarchist perspective. The mission of STR is to advance the cause of liberty, primarily by de-mystifying and de-legitimizing the State. STR seeks a world where people are free to live their lives as they see fit, as long as they don't use force or fraud against peaceful people.

## VANCOUVER TO MOSCOW BY HUMAN POWER

http://www.vancouvertomoscow.com/index.php

VIA Yahoo Weekly Picks

"No sails, no engines -- just raw human energy." That's the mantra of these daring travelers, one Russian and a pair of Canadians, who have set their sights on a nine-month, man-powered

odyssey to raise the profile of zero-emissions transportation. Come June, with only their bike pedals, skis, and rowboat oars to assist them, they will cross two continents and the treacherous Bering Strait, all the while chronicling their adventures and cultural encounters with photo galleries and a weblog. As Colin, Tim, and Olya see the journey, it's a fun and healthy way to demonstrate how everyday people can combat climate change. Their challenge to us is simple: If they can propel themselves across 11,000-plus miles on elbow grease alone, will you propel yourself to work or school?

## THE WORLDWIDE WEB TIDE & CURRENT PREDICTOR

http://tbone.biol.sc.edu/tide/sitesel.html

VIA Sheldon Harvey, Greenfield Park, Quebec

Are you interested in worldwide high and low tides, current predictions, etc? Select a region, and then from that page, select a site for which to generate predictions. You will get basic predictions and a form for customized predictions. Predictions take a few moments to calculate, please be patient.

## ICEBERGS OF NEWFOUNDLAND AND LABRADOR

## NEW FROM THE A.R.R.L. & THE R.S.G.B.:

## RSGB IOTA DIRECTORY - 40TH ANNIVERSARY EDITION

Edited by Roger Balister, G3KMA

40 years of the IOTA (Islands on the Air) are celebrated in the essential guide to participating in the program. This glossy book contains a special feature looking back over the last 40 years of IOTA along with everything needed to enjoy collecting or operating from islands for this popular worldwide program.

This 40th Anniversary Edition builds on the extensive data revision seen in recent years. Fully updated, it provides the only complete, official listing of IOTA islands available, with the many recent changes. The Directory lists all islands that qualify for IOTA, grouped by continent, and indexed by prefix. It also details the award rules, and includes application forms and masses of information and advice for island hunters and intending award applicants and DXpeditioners alike. This edition also contains for the first time for several years some "Yearbook material" and is a must have book for every island chaser.

Radio Propagation - Principles & Practice
by Ian Poole, G3YWX

Radio propagation is a vital topic for any radio amateur or anyone with an interest in radio communications. This book provides a fascinating description of all the relevant information about radio propagation from HF to VHF, UHF and beyond.
The book includes everything you need to about radio waves and how they travel, the atmosphere, the Sun, ionospheric propagation (with the important modes and information), ionospheric storms and aurora, how to predict and assess ionospheric propagation, tropospheric propagation, meteor scatter, and space communications. You are also guided in making the most of the available equipment, choosing the right time and radio band.
This book provides the reader with a practical understanding of radio propagation so that they can use them to their best. Essential reading for anyone associated with radio communications.

## THE SLIP-UP ARCHIVE

http://www.slipups.com/

VIA Sheldon Harvey, Greenfield Park, Quebec

The term "Slip-Up" means any amusing accidental blooper or mistake that wasn't caught, and made its way to the viewing public. They can be inconsistencies in movies, like an actor wearing something in one shot, and it's missing in the next shot. Or they can be funny errors in books. If it's a Slip-Up that is entertaining, accidental, and in a popular medium where others can see the Slip-Up for themselves, we want it posted in this archive.
